

# README

Avi Caciularu

Dor Bank

- section1.py file runs the first programming question, and section2.py the second.
- After being in the correct directory, the command to run is:

```
python sectionX.py <output_path>
```

and for running in the current location:

```
python sectionX.py
```

where **X**=1 for question 1 and **X**=2 for question 2.

- The output files are PNG images that include the plotted graphs requested in the sections of the questions.
